📍 **Home:** A_35, Block_A, Sector 39, Noida Golf Course, Noida, 201301 Gautam Buddha Nagar (India)

ABOUT ME

Passionate machine learning and blockchain developer skilled in building real-time detection systems, smart contracts, and NFT-integrated platforms. Experienced in applying advanced ML models, developing blockchain solutions for real-world use cases, and leading VR and game development projects with a focus on innovation and impact.

PROJECTS

[Apr 2025 – Current]

360° VR Campus Metaverse

Leading development of an interactive VR tour for the college website, showcasing campus spaces using 360° images and Three.js integration.

[Feb 2025 – 20 May 2025]

Blockchain × VR Real Estate (Research)

Co-authored paper on using blockchain and NFTs to enable VR-based property viewing, ownership, and transaction tracking in virtual environments.

[Jan 2025 – 15 May 2025]

Orb of Valor (game)

2.5D platformer game with combat and stealth, built in Unity/C#. Designed AI, player mechanics, and level layouts; refined gameplay through play-testing.

Minor ML projects

- **Real-time Mask Detection Software** — Built using SVM (Support Vector Machine) to detect whether a person is wearing a mask via camera input.
- **Real-time Australian Sign Language Detection System** — Developed a live detection system using image input to classify Australian Sign Language gestures.
- **Letter Recognition App** — Created an interactive app where users draw letters on a canvas, and the model predicts the letter in real time.

EDUCATION AND TRAINING

BS in Data Science and Applications

Indian Institute of Technology, Madras [Current]

City: online | Country: India | Website: <https://study.iitm.ac.in/ds/>

B.Tech in Artificial Intelligence and Machine Learning

University School of Automation and Robotics, GGSIPU-EDC [Current]

City: East Delhi | Country: India | Website: <https://sites.google.com/view/ggsipuedc/home>

WORK EXPERIENCE

 *GDGSC (game-dev guild students club), GGSIPU-EDC*

Game Developer

[Current]

- I developed various games and mini projects using [technologies used, e.g., Unity, C#.
- Collaborated with a team of 8 members to design and implement game mechanics, graphics, and user interfaces.
- Conducted playtesting sessions and gathered user feedback to refine and improve gameplay.

 *University School of Automation & Robotics, GGSIPU*

Project Lead — Campus Metaverse Lab

[Current]

- Leading a team to develop a 360° VR campus tour for the university website, enabling virtual exploration of classrooms, amenities, and labs.
- Managing 360° image capture, VR environment design, and deployment using Three.js and A-Frame.
- Coordinated sprint cycles, delegated tasks, and ensured on-time delivery of milestones.

 *IIT Delhi*

Campus Ambassador — Tryst 2025, IIT Delhi

- Coordinated outreach and engagement strategy for IIT Delhi's flagship tech fest.
- Managed peer networks across campuses to maximize event reach and visibility.
- Leveraged digital channels to drive registrations and meet participation targets.

SKILLS

Languages and Framework

python / c# / ML models / scikit-learn / Java / C / TensorFlow / SQL / Git / Docker / Unity / OpenCV

Skills

Personal Relation / Problem Solving / Leadership / Communication / GameDev / Machine Learning / Blockchain / VR development / DSA
